Hi!  
I am Little Splash.  
I am a drop of water!

# LITTLE SPASH

I sometimes live in the  
clouds, where I wait for  
a rainy day.

When it gets cold and gray clouds arrive,  
you will see my friends when we come for a visit!

We are raindrops!

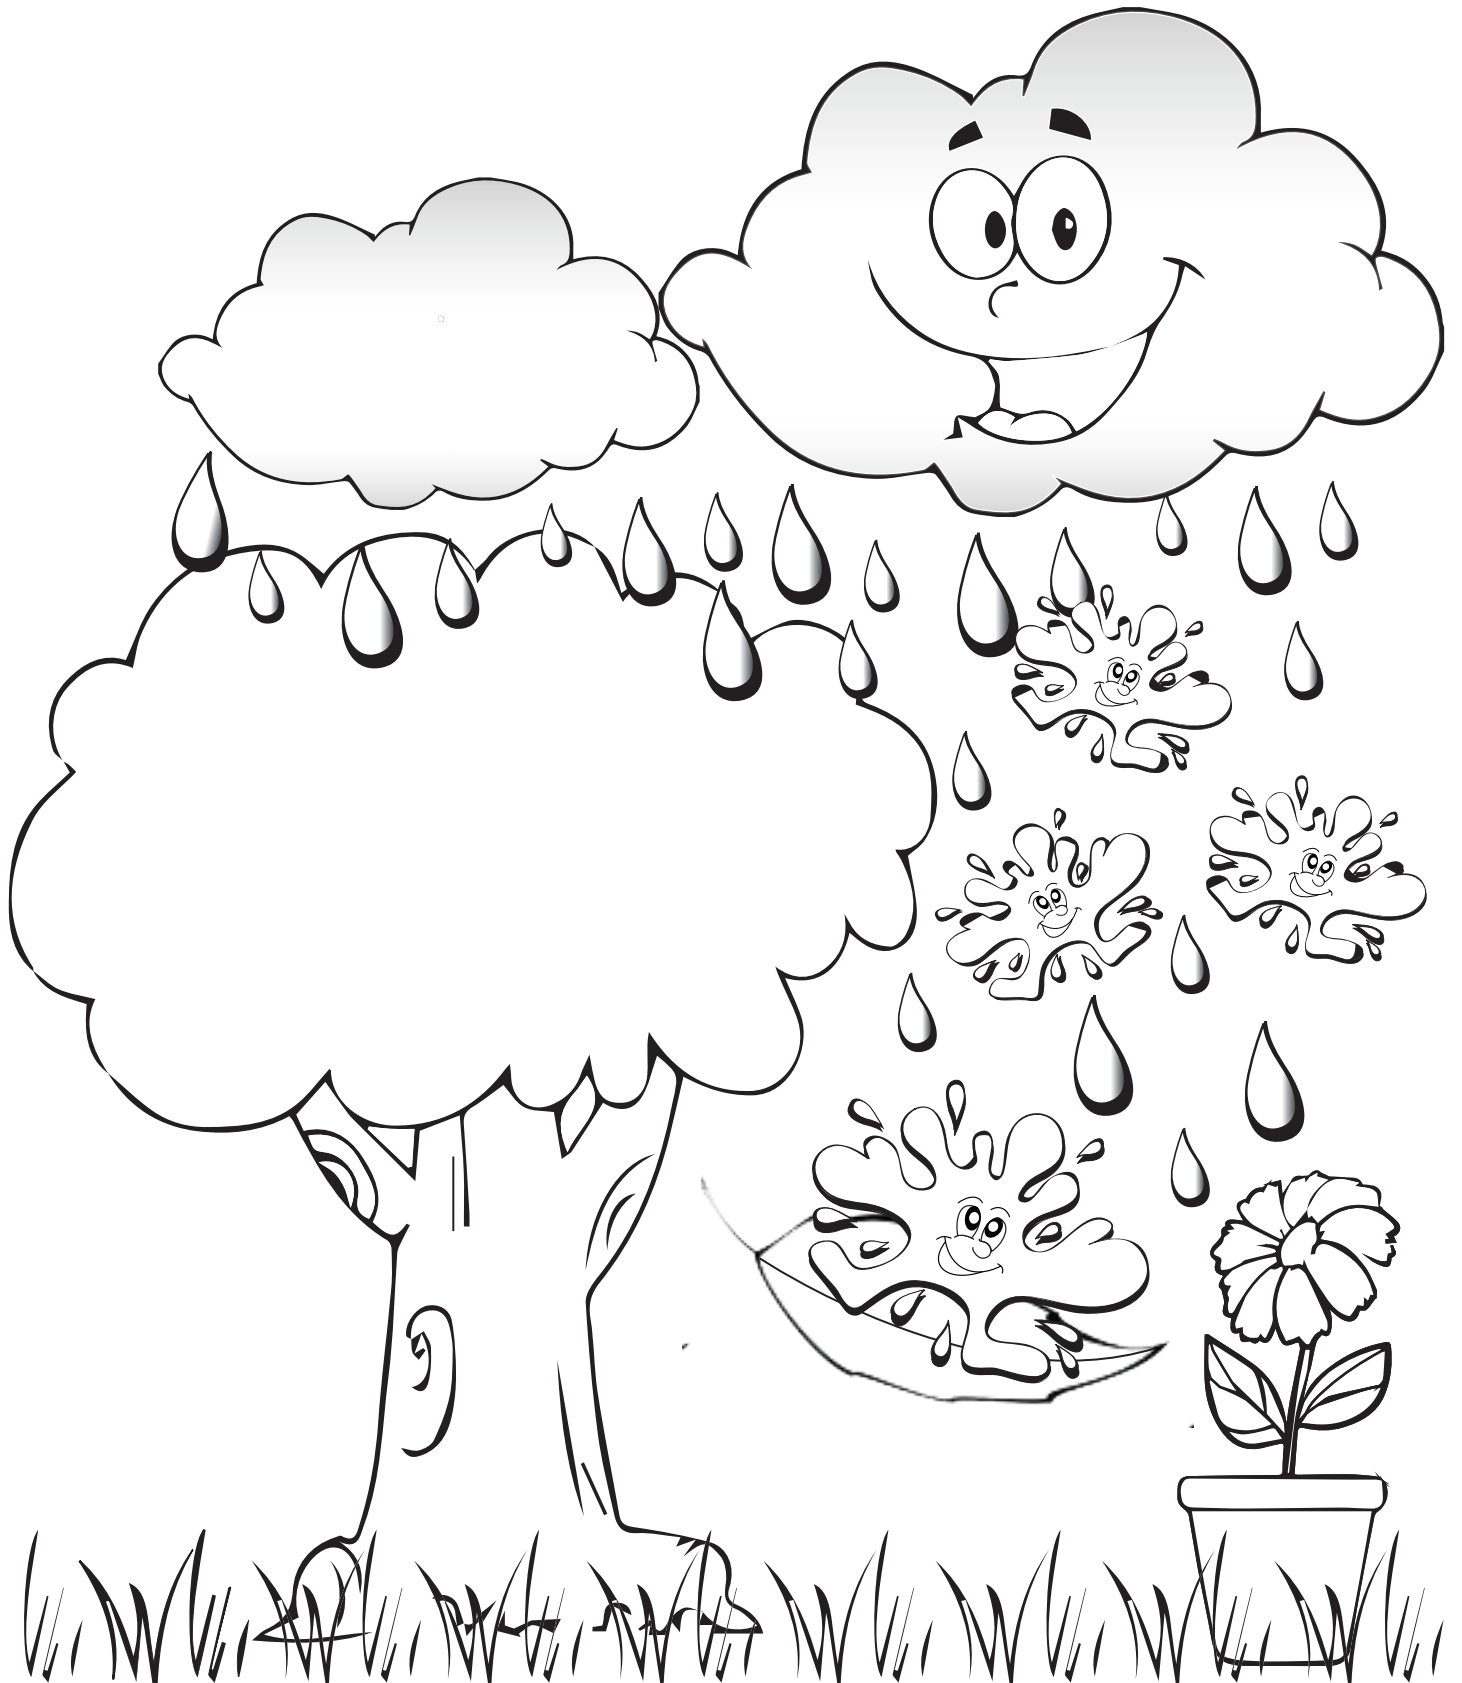

Rain can make puddles of water that some kids like to jump in!

I hope I am not jumped on!

Plants, trees, flowers and grass use raindrops to help them grow.  
Lots of other things use water too!

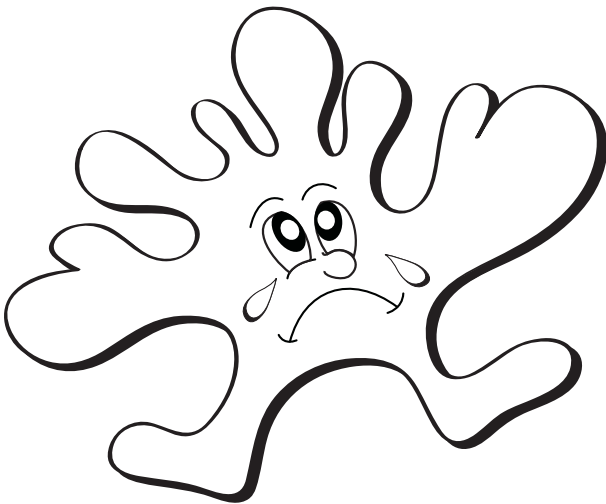

When it rains, some people use buckets to catch the rain.  
They save the water to use on days when there is no rain!

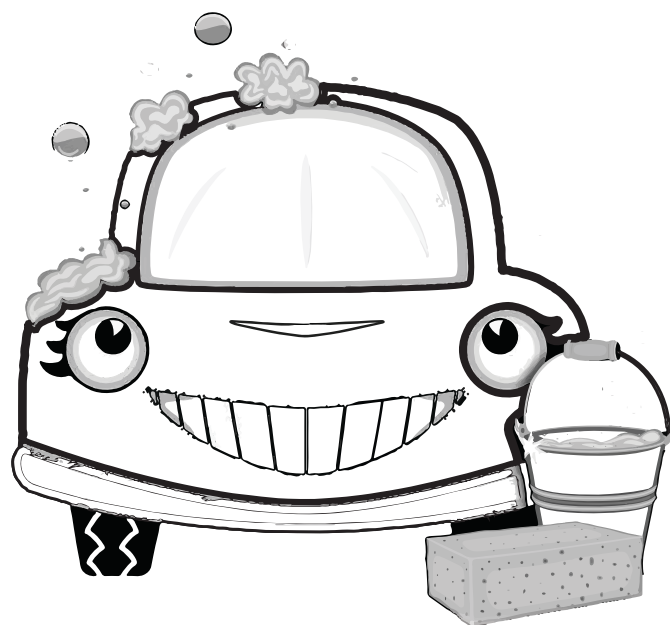

Little Splash thinks that wasting water  
is something no one should do!

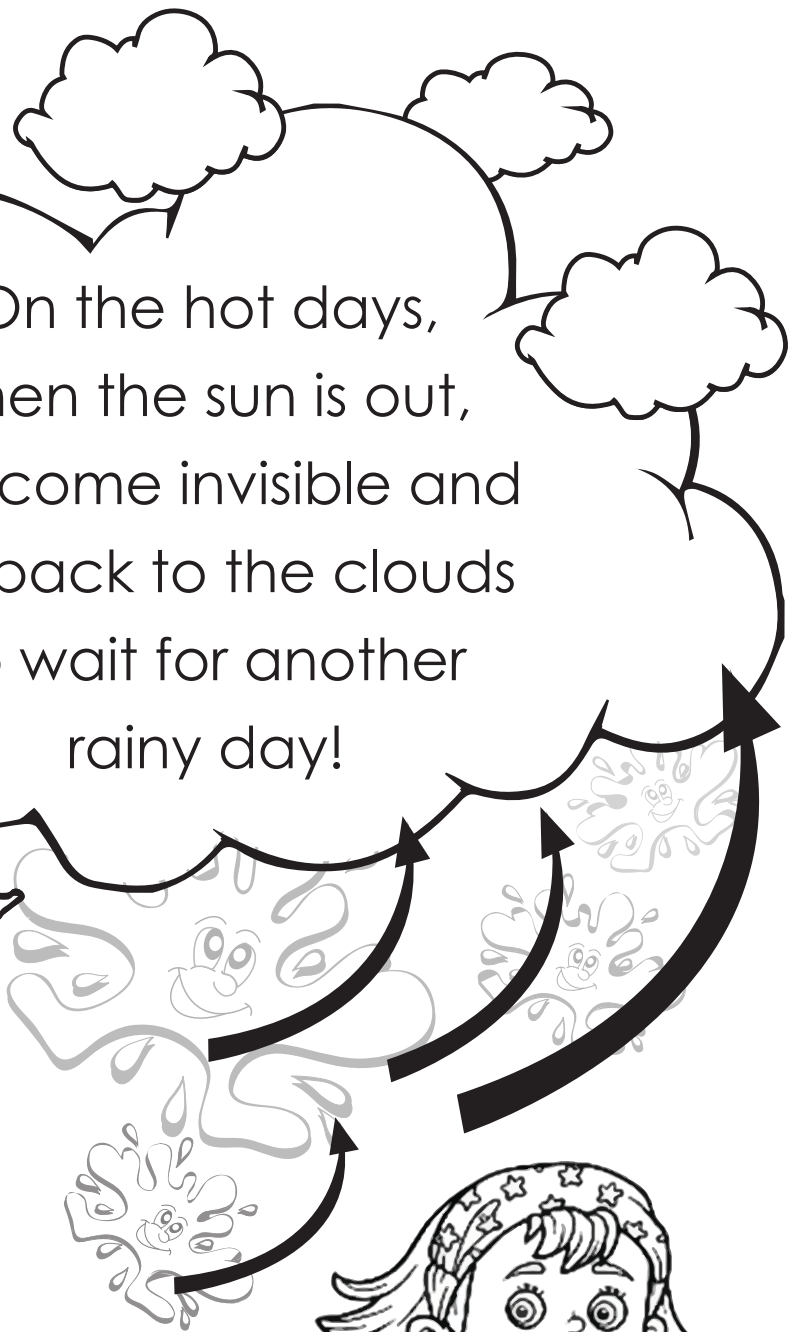

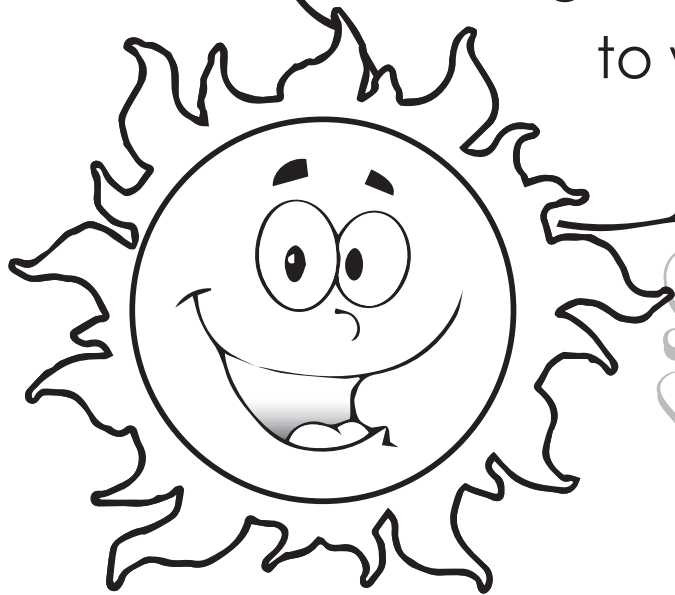

Draw a line from Little Splash to each  
of the pictures where water is being wasted.

Little Splash thinks that saving water is something everyone should do!

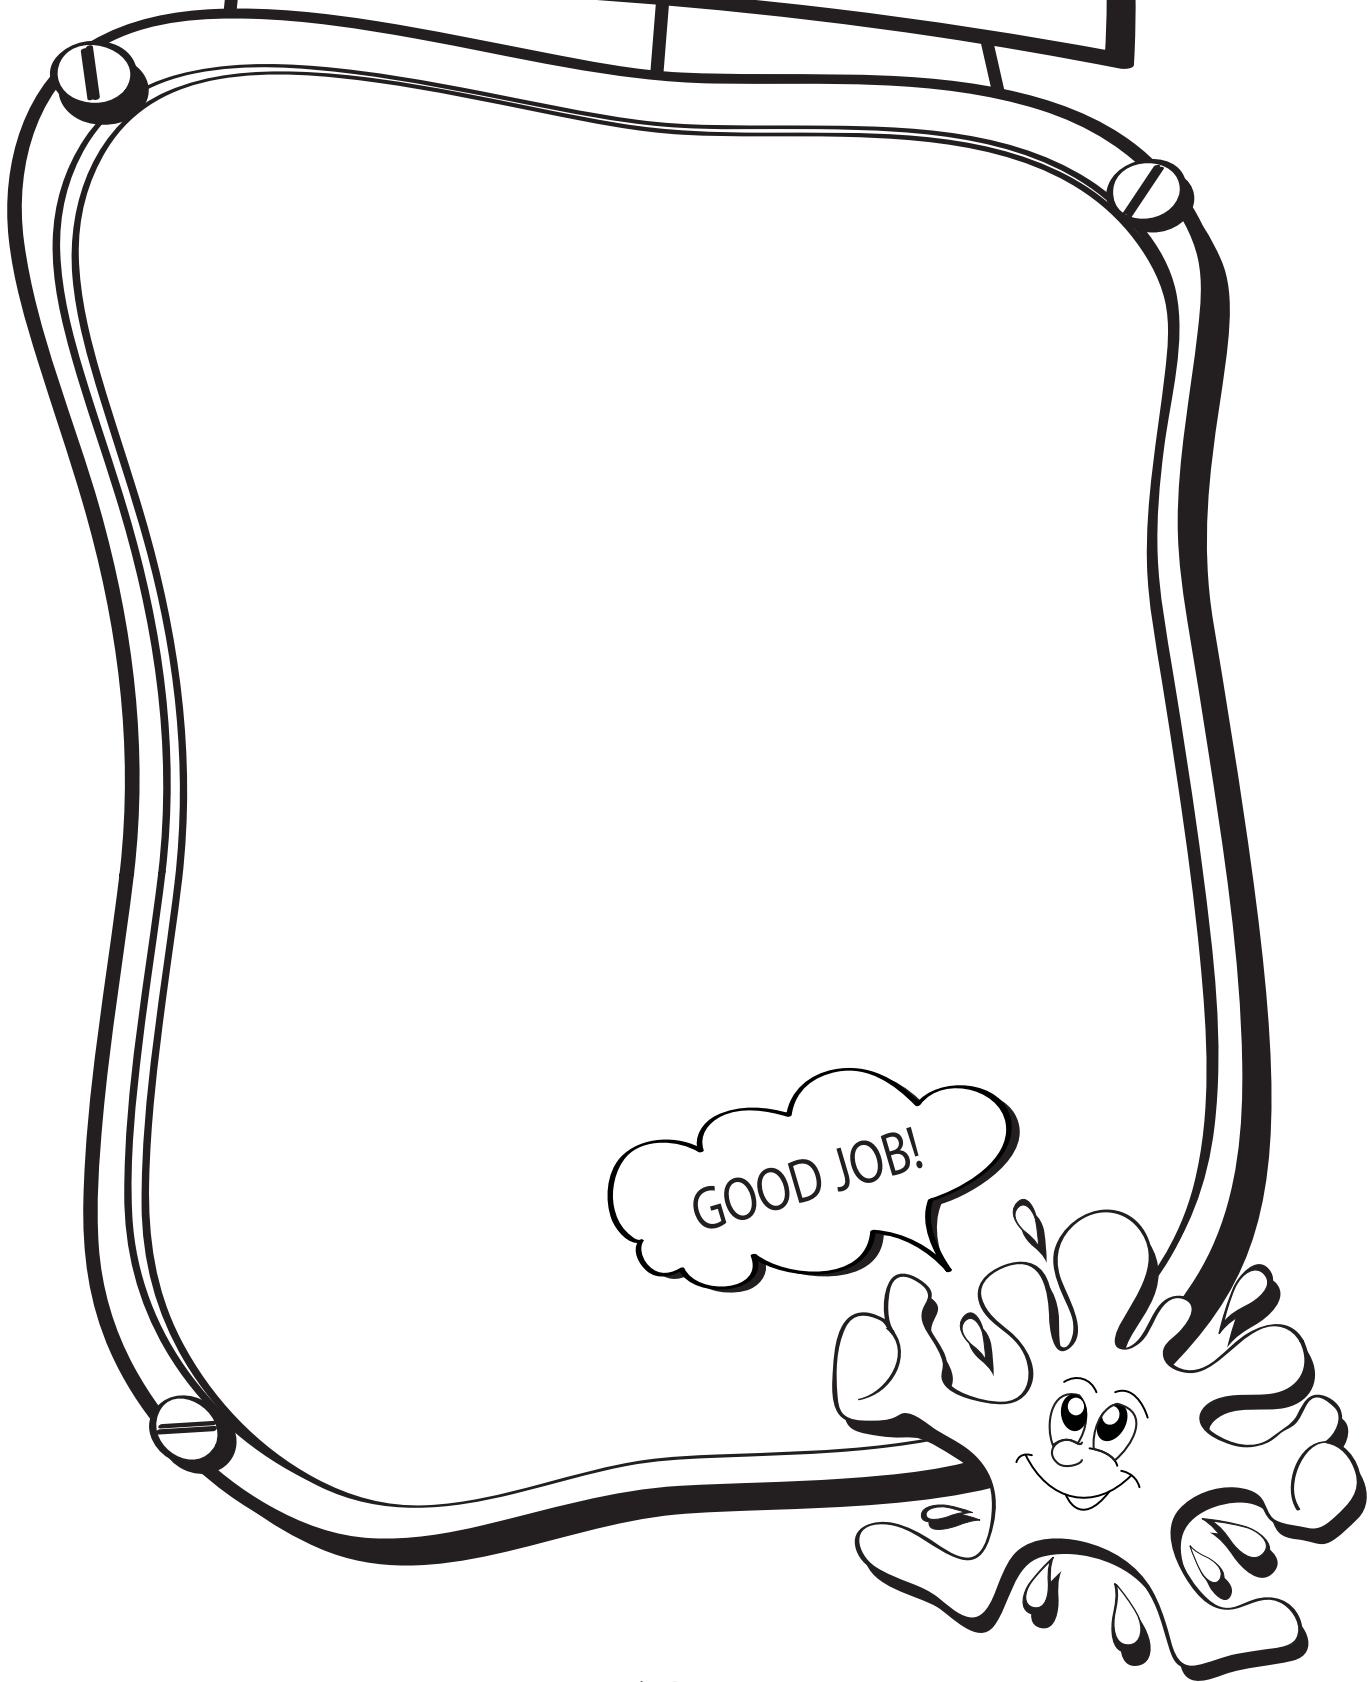

Draw a line from Little Splash to each of the pictures where water is being saved.

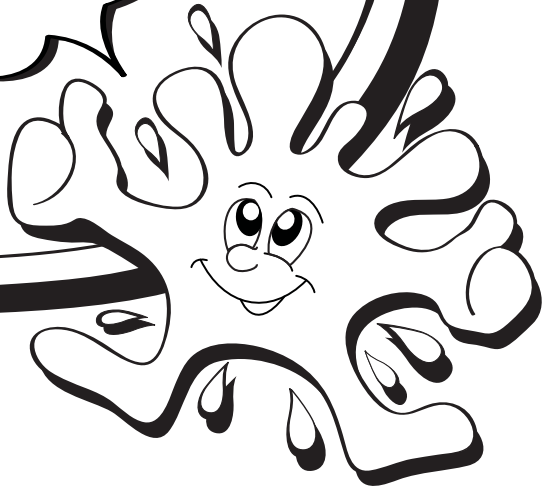

On the hot days,  
when the sun is out,  
I become invisible and  
go back to the clouds  
to wait for another  
rainy day!

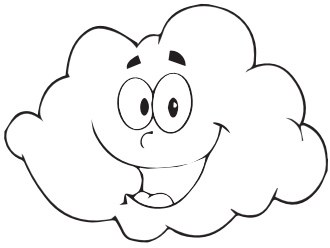

This is a picture of ME  
saving water!

GOOD JOB!
